When I started thinking about this section I realized there are businesses that are outside the South Lake area that have an impact on this area. Some of these companies impact the community in a local and global way. Sharing their story and vision will have profound effects on all of us. So I decided to interview some of the founders of different corporations across the country.

What I want to emphasize is the connective elements that draw us all together in this global economy. From successful financial institutes, global conservation, technological success, to cutting edge health advances we are part of the equation.

What we will emphasize is how these companies achieved their success. From their use of the web to share their message, to rolling up their sleeves, and working long hours to achieving their success, these entrepreneurs will inspire us.
